Series 800

Preliminary remark - grid system.

Series 800 element cabinets are made from melamine-resin-coated LIGNOpal chipboard with glue-on plastic or beech edge. Cabinets are available in 6 widths, 6 heights and 2 depths. One height grid (1FH) corresponds to 14 3/4". Add-on cabinets are available 2FH without [1] and with [2] base for a ladder rail to be installed (cf. table). In addition, many models (without technical built-in components) can be variably shortened in the width, height and depth dimensions in five-millimetre increments and thus built for a perfect fit in all room situations.

Top shelves are placed on the side walls and thereby form a cleanly structured top cover for low cabinets.

Cabinet fronts (7/8") and further protruding parts such as handles for example are not taken into consideration in the depth specifications.

Erection: Models from a height of 77 5/8" or models with drawers and/or pullouts (DGVV Regel 108-007) must be secured to the wall or floor.

The following material groups are available to choose from: Front made of LIGNOpal: L3; Body and bases made of LIGNOpal: L3; Front veneered: F1.
