

PRODUCT INFORMATION AddBasic-Blende_TY_US - 22.11.2021 - www.vsamerica.com

AddBasic Functional panel.

Construction. Made of chipboard laminated with melamine-resin sheet with plastic edges and 3 integrated functional profiles to accept organisational accessories on the user side. The functional panel is attached to the table cross-member. The space between panel and tabletop is filled with a brush through which cables can be pushed.

Applications. AddBasic can be used on Series 901 tables, which, however, must have a long straight edge. (rectangular, wedge-shaped and sinusoidal).

The following material groups are available to choose from: Cover made of chipboard: L6.
