

PRODUCT INFORMATION Leaf_TY_US - 11.01.2024 - www.vsamerica.com

Leaf Tent element for floor-level learning.

Tent elements for creating individual withdrawal areas in the classroom for individual children or small groups. The triangular material elements can be combined with the mats from the Shift+ series to create tent configurations and nooks and crannies. Similarly, the textile sail-type elements can be fixed to any magnetic surface (cabinets from the Shift+ series) using magnetic fastenings. A tent pole, which can also be used in combination with the Drum storage element and/or the triangular Shift+–Landscape mats, makes it possible to construct a round tent consisting of a maximum of 6 sail elements.

Fabric sail element, consisting of a stretch fabric and glass fibre rods for tensioning the triangular surface. With 3 connection points on one end and one connection point on the other (pointed) end.

Tent pole, consisting of a solid wood pole with a connection point positionable in two heights to affix up to 6 Leaf elements.

Shift+–Landscape mats, optionally with 1 to 3 fixing points (see above).

Magnetic fixings to fasten the sail elements to any magnetic surface.

Storage bag for transporting and storing the sail elements and curved fiberglass rods

The following material groups are available to choose from: Fabric sails: S77; Fabric cover: S40,64,82.
