

PRODUCT INFORMATION S11-Re_TY_EN - 05.12.2016 - www.vs-furniture.com

Serie 1100 Stand-at and sit-at workplace (rectangular tables).

The table consists of a working surface with set-back frame of rectangular steel tube supported by a middle post with floor plate.

Supporting post (Powerlift) of naturally-anodised aluminium with height adjustment either manually with a winding handle or motorised with optional programming facility. The patented specially shaped floor plate with plastic cover allows the easy parking of pedestals and offers optimum legroom.

Add-on elements can be positioned on the post (cable channel) or on the cross-member (screen).

Electrification is supplied by either a wire cable basket underneath the top or a removable perforated-metal panel on the post.

The table top (rectangular) is of a melamine-resin laminated, veneered or linoleum covered LIGNOpal chipboard with glued-on (KU) plastic or (BU) beech edges and rounded corners.

The following material groups are available to choose from: Frame made of aluminium: M(anodisé); Top made of LIGNOpal-plastic/beech: L3; Top made of linoleum: L8; Top veneered: F1.
